Management's Discussion and Analysis of Financial Condition and Results of Operations of Cable Onda, S.A.

The following discussion of our financial condition and results of operations should be read in conjunction with the unaudited interim condensed consolidated financial statements as of March 31, 2021 and 2020 and the notes.

Overview

Founded in 1990, we are the leading provider of Pay-TV, broadband Internet, telephony and mobile telecommunications services in Panama, serving residential (B2C). Through our flagship "Tigo" brand, we are the largest provider of fixed broadband internet and fixed telephony in Panama. We also offer B2B services to governmental, enterprise and SME customers, including fixed Internet, cloud and backup solutions, outsourcing of both IT department management and operations, personalized IT projects, and cybersecurity. Through our wholly owned subsidiary Grupo de Comunicaciones Digitales ("GCD", formerly Telefonica Moviles Panama), we are the largest provider of mobile communications services in the country. We are the market leader as measured by revenue and number of customers, serving more than 2.0 million mobile customers and more than 1.0 million fixed revenue generating units (RGUs) as of March 31, 2021.

Throughout our 30-year history, we have experienced significant organic growth, complemented by strategic acquisitions, which have helped us strengthen our leadership position. Our growth has also been driven by our consistent investments to maintain, expand and upgrade our network capabilities to allow us to offer advanced communications and entertainment services with a high degree of reliability and customer satisfaction. As a result of these investments, our cable network today is entirely digital and employs the DOCSIS 3.0 standard. Our network also includes more than 11,500 km of HFC and more than 8,000 km of fiber, with more than 495,000 customer relationships.

Recent Business Developments

On August 29, 2019 we acquired 100% of the share capital of GCD for \$593.6 million from Telefónica Centroamérica Inversiones, S.L., which was owned, directly and indirectly by Telefónica S.A. ("Telefónica Panamá Acquisition"). The Telefónica Panamá acquisition is consistent with our strategy to solidify our telecom market leadership, enable fixed-mobile convergence, and to grow and diversify our sources of cash flow.

On November 1, 2019, Cable Onda completed a bond debt offering under the Rule 144A and Regulation S, of \$600 million aggregate principal amount of 4.500% senior unsecured notes due January 30, 2030 (the "Notes). We used the net proceeds from the offering to partially finance the acquisition of Telefónica Panamá, to refinance other debt, and for general corporate purposes. The Notes are listed on the Panama Stock Exchange and on the Luxembourg Stock Exchange.

The Notes were sold within the United States to qualified institutional buyers under Rule 144A and to certain non-U.S. persons in offshore transactions under Regulation S under the Securities Act.

Liquidity and capital resources

Historically we have relied primarily on cash from operations and external bond and bank financings to fund our operations, capital expenditures and working capital requirements. We intend to continue to rely on these funding sources going forward.

We believe that our sources of liquidity are sufficient for our present requirements for the next 12 months and beyond. Although we believe that we should be able to meet our debt service obligations and fund our operating requirements in the future through cash flow from our operations, we may seek additional financing in the capital markets from time to time, depending on market conditions and our financial requirements. We intend to continue to focus on investments in property, systems, and equipment (fixed assets) and working capital management, including the timely collection of accounts receivable and efficient management of accounts payable.

Capital expenditures including intangible assets

Our capital expenditures for the period ended March 31, 2021 were \$21.4 million, mostly driven by investments in customer premise equipment (CPE) installation cost, IT equipment and core network expansion and new site leases and renewals.
