

During **Girls in ICT Week**, whose theme for 2024 is "**Leadership**," we reaffirm our commitment to empowering young and adult women in digital skills.

Today,  **CONNECTADAS** our digital education and inclusion platform is celebrating its anniversary.

**Conectadas** originated from an initiative by **GSMA** to empower young and adult women in the advanced use of technology and the internet.

**More than 900,000 women** have been trained, aiming to help close the gender digital divide in the **9 countries** where we operate.

To celebrate this significant milestone, we are excited to share our website **EducacionContigo.com**, which features **new, innovative, and free educational content.**
